

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a 3x3 arrangement of dots, where the presence or absence of a dot at a specific position represents a binary value (0 or 1) for a particular digit (0-9). The grid is organized such that the rows and columns correspond to the digits 0 through 9, illustrating the Cartesian product of the set {0, 1, 2, 3, 4, 5, 6, 7, 8, 9} with itself.
