

07-16

The image displays a 10x10 grid of 100 small clusters of black dots on a white background. Each cluster represents a different number from 0 to 99, using a pattern of dots to form the digits. The numbers are arranged in rows: the first row contains 0-9, the second row 10-19, and so on, up to 90-99 in the tenth row. The dots are arranged in a way that is reminiscent of a dot-matrix display or a Braille-like system, where the position and count of dots form the shape of the digits.
