

10-15

A 10x10 grid of 100 small clusters of black dots. Each cluster represents a different number from 0 to 99. The clusters are arranged in a grid that visually represents the multiplication table 100 x 100 = 10,000. The numbers 0-9 are represented by small groups of dots, while the numbers 10-99 are represented by larger, more complex arrangements of dots. The overall pattern of dots in the grid is a visual representation of the multiplication of 100 by 100.
