

The figure consists of 10 sub-diagrams arranged horizontally, each showing a pattern of black dots on a grid. The patterns evolve from left to right, starting with a small cluster of dots and growing into a more complex, branching structure.

The figure consists of seven sub-diagrams arranged horizontally, showing the evolution of a cluster of points. 
 1. The first diagram shows a 2x2 grid of points.
 2. The second diagram shows a single point at the top and two points below it.
 3. The third diagram shows a more complex arrangement with points at various positions, some forming a central cluster.
 4. The fourth diagram shows a similar arrangement to the third, with slight shifts in point positions.
 5. The fifth diagram shows a cluster of points in the center with several points scattered around.
 6. The sixth diagram shows a more compact central cluster with points further away.
 7. The seventh diagram shows a final stable configuration with a central cluster and a few isolated points.
