

The image displays a 10x10 grid of 100 Braille characters. Each character is composed of dots on a 3x3 grid. The first row and the first column contain the Braille digits 1 through 0. The remaining cells in the grid contain the products of the digits in the first row and column, forming a multiplication table. For example, the cell at row 2, column 2 contains the Braille character for 1 (dots 4-5), representing 1x1=1. The cell at row 10, column 10 contains the Braille character for 0 (dots 4-5-6), representing 0x0=0.
