

The image displays a 10x10 grid of 100 Braille characters. Each character is a unique combination of dots 1 through 6, arranged in a 2x5 grid pattern. The characters are organized into four groups of 25, corresponding to the four quadrants of a 2x2 grid. The groups are defined by the position of the dots in the 2x5 grid. The first group (top-left) has dots 1-4 in the first column and dots 5-6 in the second column. The second group (top-right) has dots 1-4 in the second column and dots 5-6 in the first column. The third group (bottom-left) has dots 1-4 in the first column and dots 5-6 in the third column. The fourth group (bottom-right) has dots 1-4 in the third column and dots 5-6 in the second column. The characters are arranged in a way that they form a 10x10 grid of 100 unique characters.
