

The image displays a 10x10 grid of 100 Braille characters. Each character is a unique combination of dots 1 through 6, arranged in a 2x3 grid. The characters are organized into 10 rows and 10 columns, representing the first 100 characters of a Braille alphabet. The characters are arranged in a way that shows the progression of the Braille alphabet, starting from the simplest character (dots 1-2-3) and ending with the most complex character (dots 4-5-6).
