

The image displays a 10x10 grid of 100 Braille characters. Each character is composed of 10 dots, numbered 1 through 10, arranged in two vertical columns of five dots each. The dots are represented by small black circles. The grid contains all possible combinations of these 10 dots, forming the Braille alphabet (A-Z, a-z), various punctuation marks, and formatting characters like bold, italic, and strikethrough indicators.
