

The image displays a 10x10 grid of 100 Braille characters. Each character is composed of dots 1 through 6 arranged in a 2x3 grid. The characters are organized into 10 rows and 10 columns, showing a systematic progression of dot patterns. The first row starts with a single dot (1), followed by two dots (1, 2), and so on, up to six dots (1, 2, 3, 4, 5, 6). The second row starts with a single dot (2), followed by two dots (2, 3), and so on, up to six dots (2, 3, 4, 5, 6). This pattern continues for all rows, with each row representing a different starting dot or combination of dots, ensuring that every possible combination of 1 to 6 dots is represented exactly once in the grid.
