

A 10x10 grid of 100 Braille characters. Each character is a unique combination of black dots on a white background, representing the 26 letters of the alphabet and various punctuation and control characters. The grid is organized into 10 rows and 10 columns, with each character occupying a single cell. The characters are arranged in a way that demonstrates the full range of Braille notation, including uppercase and lowercase letters, numbers, and special characters.
