

The image displays a 10x10 grid of 100 Braille characters. Each character is composed of dots on a 3x6 grid. The dots are arranged in a way that each character is unique and represents a different Braille character. The grid is organized into 10 rows and 10 columns, with each character occupying a single cell. The characters are arranged in a way that they represent the Braille alphabet and various Braille symbols, including punctuation and mathematical symbols. The grid is a visual representation of the Braille code, showing how different combinations of dots form different characters.
