

The image displays a 10x10 grid of 100 Braille characters. Each character is a unique combination of black dots on a white background, representing the first 100 characters of a Braille alphabet. The characters are arranged in 10 rows and 10 columns. The first row contains 10 characters, the second row contains 10 characters, and so on, up to the 10th row which also contains 10 characters. The characters are formed by different patterns of dots, with some characters having more dots than others. The dots are arranged in a way that they are easily distinguishable from each other and from the background.
