

The image displays a 10x10 grid of 100 Braille characters. Each character is a unique combination of black dots on a white background, representing the first 100 characters of the Braille alphabet. The characters are arranged in 10 rows and 10 columns. The first row contains characters from Braille A to J, the second row from K to T, and so on, following the standard Braille alphabet sequence. The characters are formed by combinations of the six dots in a Braille cell, with some characters using all six dots and others using fewer.
